Research Experience

Oct 2021–Feb 2022 **Research Intern**, *FAIR, Meta AI*, San Francisco, US.
- Working on Multi-Modal foundation models

Oct 2021–Feb 2022 **Research Intern**, *Samsung AI Center*, Cambridge, UK.
- Work on efficient mobile vision transformer. (Work published in ECCV'22)
  - We propose a family of lightweight ViTs from the practical on-device deployment perspective.
  - We build a benchmark of the on-device performance of mainstream ViTs.

Mar 2017–Dec 2017 **Research Assistant**, *DVMM Lab at Columbia University*, New York, NY.
- Work on Video Modelling and Prediction tasks.
- Propose novel methods for Online Action Detection that is to detect action in a timely manner and to recognize its action category. (Work published in ECCV'18)
  - I mainly contributed in the core idea for the detection model and its implementation.

Feb 2015–Feb 2017 **Research Assistant**, *Image Processing Group, Univesitat Politecnia de Catalunya*, Barcelona, Spain.
- Research on saliency prediction and generative models under supervision of Professor Xavier Giro-i-Nieto, Elisa Sayrol, Cristian Canton (Facebook, Seattle, WA) and Kevin McGuinness (Insight Centre DCU, Dublin, Ireland)
- We proposed a winning solution for LSUN Challenge in CVPR'16 which was lately published in CVPR'17
- We investigated the contribution of Adversarial loss in Saliency Prediction task. The model is now one of the most popular saliency prediction model (SalGAN).
